

Job Description: Apprentice Engineer

This is an exciting opportunity to start a career as a Security Engineer. Working alongside qualified engineers, you will learn from the ground up all different aspects of the industry. This position covers all aspects of security including Intruder, Fire, CCTV and Access Control with both domestic and commercial environments.

The ideal candidate for this role will be ready and willing to learn their trade and absorb all that is being shown to them.

THE QUALIFICATION GAINED WILL BE:

Level 3: Fire Emergency and Security Systems Technician

Apprentices will spend 3 weeks of the month training alongside qualified engineers within the company and then 1 week a month at the Stroud Campus of Stroud and South Gloucestershire College.

KEY REQUIREMENTS:

- C or Above GCSE in English, Maths and ICT or equivalent
- No unspent criminal convictions
- Non-smoker
- Clean driving license
- Problem solver and logical thinker

The successful candidates will need to be able to travel to our Cirencester Head Office each day ready to leave with the Qualified Engineer.

Apprentices will participate in the following activities:

- Installation
- Servicing
- Fault finding
- Small Works repair
