

SMART ACCESS ENTRY

The system which helps automate your sports venue's access and lighting through the Club Spark booking system

Taking the basic features of the already established Smart Access system, Entry allows smaller venues with lower footfall and without the need for lighting integration to improve access at their site.

1 INSTALLATION

Using a universal fitting enclosure we can fit the system to any existing court which saves on replacement of the whole gate. The enclosure can be colour matched to the existing.

2 GAINING ENTRY

Entry is gained via digital keypad situated outside of the court. Once the access code is entered, the lock releases and you are able to open the gate.

3 EXITING THE COURT

Turn the handle that is located on the gate - no pins or cards are need to exit a gate

4 VANDAL RESISTANT SHROUD

Fitted with a steel shroud, the keypad and lockset are further protected against damage.

5 SELF CLOSER

An automatic closer is fitted as part of every installation to ensure the security at the gate is maintained.

6 KEY OVERRIDE

In the case of an emergency, there is a key override built to play management resource control into the lock on the outside of the gate, insert the key and turn to allow access.

7 LIGHTING CONTROL BOLT ON (Optional)

Utilising existing security technology we have developed a bolt on product that can integrate with your lighting system to offer automated lighting with any court booking.

Eclipse EcoPure

In addition, we can also offer an Anti Microbial Coating. Preventing the transfer of bacteria and viruses from door handles, finger plates and pull handles is just one way to help protect staff in their working environment.
