

PROVIDING PEACE OF MIND
Since 1982

GLOUCESTER ROWING CLUB

Gloucester Rowing Club was formed in 1846 and has been supporting and encouraging rowing in Gloucestershire ever since. Currently, we boat from the Gloucester-Purton canal, just below Hempsted Bridge in a purpose built site shared with a number of partner rowing clubs as well as Gloucester Canoe Club.

The club welcomes both experienced and aspiring rowers as well as anyone wanting to try out the sport by taking part in one of our Learn to Row courses. We have an active community of members ranging in age from Juniors through to Veterans aged 80 and above. The common theme being a feeling that a healthy life style, at any age, can't be a bad thing.

Gloucester Rowing Clubs' refurbishment of their Boathouse facility required the supply and installation of a complete new CCTV system. This system needed to work 24 hours a day without any glitches. The system had to facilitate remote viewing/playback for management staff.

"I would like to say that CIA has given excellent service at ABB for many years now and continue to do so. CIA have always done things in a timely manner with quality at the forefront."

Stephen Drose

PROJECT SUMMARY

BUILDING TYPE

Purpose Built Rowing Club

TIMELINE

Retro fitted over the course of a few days.

REQUIREMENTS

Supply and install a new CCTV system to provide protection during the day and night, with remote viewing and playback for management staff.

TECHNOLOGY

- IP Camera System
- 5MP High Definition Cameras
- Infra Red Night Vision
- Remote Access
- 30 Day Playback as standard
