

PROVIDING PEACE OF MIND  
Since 1982

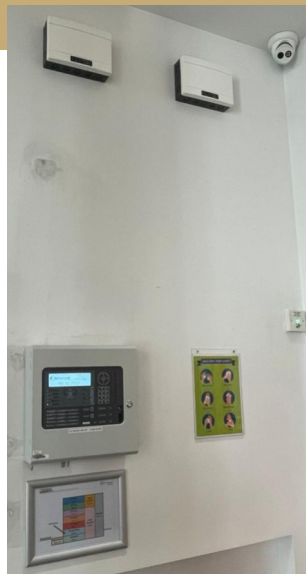

For 50 years CAPA: The Global Education Network has worked with institutions of higher education to build programs that meet their goals for learning abroad.

They operate education centers in global cities and have developed distinct academic offerings, support frameworks, and oversight structures for their students and visiting faculty.

CIA spent several days at CAPA's London Centre upgrading the existing fire alarm system to the new HyFire Taurus range. The installation comprised over 100 new devices across seven storeys.

*"We are very pleased with the work done by the CIA engineers and team during, and after, the installation process of our new fire alarm system. The installation was carried out within the agreed deadlines and with high standards of professionalism and quality of work."*

**Anderson Hillen (London Centre Administration Co-ordinator)**

## PROJECT SUMMARY

### BUILDING TYPE

Educational Facility

### REQUIREMENTS

Upgrade outdated wireless fire alarm system

### TIMELINE

5 Days

### TECHNOLOGY

- Hyfire Taurus Wireless Fire System
- CSL DualCom
