

PROVIDING PEACE OF MIND
Since 1982

UNDERWOOD SURGERY

Cheltenham's Underwood Surgery is a family-run medical practice with 10,000 patients, and a rating of 'Good' by the Care Quality Commission.

They specialise in maternity and midwifery services, family planning, surgical procedures, diagnostic & screening procedures, treatments, and general services.

In order to improve their daytime security, Underwood Surgery contracted CIA to upgrade both their Fire and Intruder alarm systems, as well as install new CCTV and Access Control systems.

"CIA provided a competitive quote for the project, with their engineers working closely with the third party building contractors in a synchronized and efficient manner. Following our experience we would certainly recommend CIA as a security solution provider."

Tracy Booth (Deputy Practice Manager)
